Muhammad Talha Atif

Full Stack MERN Engineer

+923064391520 ◇ talhaatif573@gmail.com ◇ Lahore, Pakistan ◇ LinkedIn ◇ GitHub ◇ Portfolio

SUMMARY

Full Stack MERN Engineer with 1+ years of production experience building end-to-end web applications using **MongoDB, Express.js, React (Next.js), and Node.js**. Delivered performant, scalable platforms from database design and RESTful API development to pixel-perfect, responsive UIs. Reduced feed load time by 75% through query optimisation, indexing, and caching. Built enterprise-grade Next.js dashboards and cross-platform mobile apps with React Native. Comfortable owning features from schema to deployment, with a strong focus on performance, clean code, and user experience.

WORK EXPERIENCE

Full Stack Engineer *Dec '25 - Present*
Intimec via MicroTechX Remote

Built and owned the Next.js dashboard for an enterprise Identity Governance platform, establishing the frontend design system and integrating secure RESTful APIs.

- Standardised the entire frontend theme, colour system, and shared component library in **Next.js**, eliminating UI drift and creating documented conventions now used team-wide.
- Integrated **JWT-based authentication and RBAC** flows into the UI, enforcing secure access to sensitive identity and entitlement data.
- Collaborated with backend engineers to define clean API contracts and optimise payload shapes, reducing over-fetching and improving page load performance.
- Implemented server-side rendering (SSR) and static generation strategies, cutting time-to-interactive by 40% on core dashboard views.

Full Stack MERN Engineer *Sep '25 - Jan '26*
Digital Upgraders LLC Remote

*Developed and maintained the full stack of a production social platform using **MongoDB, Express, Node.js, and Next.js** for photographers and creative professionals.*

- Built and optimised RESTful APIs for feeds, notifications, user profiles, and media workflows, handling thousands of daily active users on the **Express/Node.js** backend.
- Cut feed load time from 3s to 700ms by restructuring **MongoDB** queries, adding compound indexes, and implementing **Redis** caching, drastically improving user retention.
- Fixed duplicate notifications by redesigning concurrent write flows with **MongoDB transactions**, restoring data consistency across the notification system.
- Led a **zero-downtime migration** from AWS to Fly.io, reworking Docker configurations, CI/CD pipelines, and environment variables on a live production platform.
- Collaborated on the **Next.js** frontend, delivering responsive, cross-browser compatible interfaces and resolving platform-specific rendering issues.

PROJECTS

Moodly | AI Experience Booking Platform (NestJS, React Native, RabbitMQ) | Demo

- Designed a full stack booking platform with **NestJS** backend APIs, async AI processing, and a cross-platform **React Native** frontend for hosts and users.
- Built modular backend with Guards, Interceptors, and Pipes for authentication, input validation, and logging across 15+ RESTful endpoints.
- Integrated a multimodal emotion detection pipeline using **RabbitMQ** to decouple voice and facial image processing, feeding results to a real-time recommendation engine.
- Enforced strict TypeScript-strict architecture on the frontend and backend, reducing edge-case bugs in production.

Memingo | Language Learning Platform (Node.js, Express, MongoDB, Next.js) | Demo

- Built the complete backend with **Node.js and Express**, delivering RESTful APIs for lessons, progress tracking, leaderboards, and AI recommendations.
- Identified and resolved a critical leaderboard bottleneck by replacing real-time recalculations with a **write-time precomputed cache**, reducing API response time from 30s to 90ms.
- Developed 9 interactive lesson components on the **Next.js** frontend, paired with a real-time object detection module on the backend that processes camera frames and returns vocabulary and cultural context.
- Integrated a conversational AI chatbot with session-aware context and structured output parsing, delivering personalised learning recommendations.

SKILLS

Languages TypeScript, JavaScript (ES6+), Python

Frontend Next.js, React.js, React Native, Tailwind CSS, Shadcn UI, Framer Motion

Backend Node.js, Express.js, NestJS, REST APIs, GraphQL (learning)

Databases MongoDB, PostgreSQL, Redis, MySQL, Supabase, Firebase

Architecture Microservices, Event-Driven, RabbitMQ, WebSockets

Security JWT, OAuth 2.0, RBAC, Rate Limiting, Input Validation

Cloud AWS (S3, EC2, RDS), Fly.io, Vercel, Dokploy

DevOps Docker, GitHub Actions, CI/CD, Git

Tools Postman, Swagger, VS Code, MongoDB Compass

AWARDS

Runner-up, App Development Hackathon (2025) *May '25*
Organized by Punjab University

Ranked, ICPC Asia Topi Online Programming Contest (2024) *Nov '24*
Organized by International Collegiate Programming Contests

EDUCATION

Bachelor's degree in Computer Science, University of Management and Technology, UMT *Oct '21 - Aug '25*
