SUMMARY

Full Stack Engineer with 1+ year of production experience taking end-to-end ownership of features across React frontends, Node.js backends, event-driven data pipelines, and AWS infrastructure. Comfortable navigating and improving existing systems, identifying performance and reliability issues proactively, and shipping solutions without heavy guidance. Hands-on experience with Redis, OpenSearch, PostgreSQL, and AI/LLM integrations using OpenAI and Gemini APIs. Self-directed, product-minded, and experienced working in small, fast-moving teams where ownership of outcomes matters more than completing tickets.

WORK EXPERIENCE

Full Stack Engineer *Dec '25 – Present*
MicroTechX Remote

Took end-to-end ownership of features across a distributed IAM platform, navigating a large existing codebase, proactively identifying issues, and shipping improvements across Node.js backend services, React/Next.js frontend, and OpenSearch analytics.

- Led a zero-downtime OpenSearch migration reindexing 5M+ documents via index templates and alias switching, resolving field-type mapping conflicts that were breaking aggregation queries across the analytics layer.
- Built an event-driven audit and approval pipeline across 8+ distributed services using Kafka, configuring consumer concurrency, dead-letter queues, and retry windows to ensure reliable real-time event processing.
- Proactively identified and fixed a critical production crash caused by unchecked nullable properties on the task management page, and redesigned the React dashboard with standardised design tokens to eliminate UI inconsistency across the platform.

Full Stack Engineer *Sep '25 – Jan '26*
Digital Upgraders LLC Remote

Owned frontend and backend development for a production social platform, proactively diagnosing performance issues, improving data pipeline reliability, and shipping features across React, Node.js, and PostgreSQL without waiting for direction.

- Diagnosed and resolved a feed performance issue by tracing the problem across database indexes, query structure, DTO payload, and caching layer, reducing API response from 3 seconds to 700ms through targeted fixes at each layer.
- Fixed a notification consistency bug by identifying a race condition in non-transactional write patterns and replacing them with proper database transactions, restoring data reliability under concurrent load.
- Led zero-downtime production migration covering Docker, DNS, Supabase, AWS-backed infrastructure, and email provider cutover across a live multi-service platform.

PROJECTS

Moodly | AI Experience Booking Platform | Demo

- Built a Python FastAPI AI inference service integrating OpenAI-equivalent models for multimodal emotion detection, with an async event pipeline decoupling inference from the booking engine under load.
- Designed and shipped the full React Native frontend and backend booking lifecycle end to end independently, from data model to UI, with secure auth and unit-tested logic.

Memingo | Language Learning Platform | Demo

- Identified a leaderboard bottleneck, replaced per-request ranking computation with a Redis precomputed cache, and cut API response from 30 seconds to 90ms.
- Integrated an OpenAI-style LLM chatbot with session-aware context and structured output parsing, and built a real-time object detection vocabulary module end to end.

SKILLS

Languages JavaScript, TypeScript, Python, Java, SQL
Frontend React.js, Next.js, React Native, Tailwind CSS, Shadcn UI
Backend Node.js, Express.js, NestJS, FastAPI, Spring Boot, REST APIs
Data / Pipelines Kafka, RabbitMQ, event-driven architecture, Redis, OpenSearch, WebSockets
Databases PostgreSQL, MySQL, MongoDB, Redis, Supabase, Firebase
Cloud / Infra AWS (S3, RDS, EC2), Docker, GitHub Actions, CI/CD, Fly.io
AI / LLM OpenAI API, Gemini API, Hugging Face, GitHub Copilot, Claude AI

AWARDS

Runner-up, App Development Hackathon (2025) *May '25*
Organized by Punjab University

Ranked, ICPC Asia Topi Online Programming Contest (2024) *Nov '24*
Organized by International Collegiate Programming Contests

EDUCATION

Bachelor's degree in Computer Science, University of Management and Technology – UMT *Oct '21 – Aug '25*
